Las Vegas IT Systems Analyst

Be the face of our Las Vegas office—where tech expertise meets innovation.

Salary: $65,000–$80,000 per year based on experience
Compensation: Includes 3 weeks vacation, 5 flex days, & health allowance.

We're looking for a capable, self-driven **IT Systems Analyst** who is ready to hit the ground running in our Las Vegas Office. We are looking for someone who has great customer service skills and is able to meet with new clients and do onsite network assessments.

What You'll Do

As an IT Systems Analyst, you'll play a critical role in managing client IT systems and identifying efficiencies and improving operational performance using technology.

Your responsibilities will include:

- Meeting with Clients and conducting **network assessments** and infrastructure audits at client sites
- Providing **technical leadership** and solutions aligned with client needs
- Provide onsite and remote support for clients during office hours.
- Performing **system maintenance, patching, and cybersecurity tasks when necessary**
- Supporting Microsoft 365, Azure, Windows Server, and virtual environments
- Supporting Client Servers potentially including VMWare or Hyper-V
- Configuring and troubleshooting **networking** systems (firewalls, switches, VPNs)
- Advising clients on **AI-powered tools** and workflow automations
- Acting as a **professional brand ambassador** for Netsmart in the Las Vegas region

Who we need

You're an experienced IT professional who thrives in autonomous settings, communicates clearly, and takes pride in delivering results. You're also curious about how **AI** can transform IT and business.

Your technical strengths include:

- **Microsoft 365** – Exchange Online, Teams, SharePoint, OneDrive
- **Azure** – Entra ID, Intune, cloud configuration
- **Cybersecurity** – Endpoint protection and configuration and other cyber security controls
- **Windows Server** – Active Directory, GPOs, system reliability
- **Virtualization** – VMware or Hyper-V management
- **Networking** – Firewalls, switches, routing, and network security fundamentals is an asset

Certifications

Please list any and all certifications that you posses such as:

- **Microsoft:** MS-100, AZ-104, MS-500
- **Cybersecurity:** Security+, CISSP, CEH, CySA+
- **Networking:** CompTIA Network+, CCNA, Fortinet NSE, Palo Alto ACE
- Any credentials related to **AI, automation**, or emerging technologies are also valued

Requirements

- Must be a U.S. citizen or permanent resident.
- Must be based In Las Vegas, Nevada
- Fluent in reading and writing English
- Valid Class 5 (or equivalent) driver's license and reliable vehicle
- Able to work independently, manage time effectively, support local clients, and report to the CEO
- No Criminal Record and is Bondable
- Must complete a background check prior to hire as the job requires working with sensitive data and secure networks
- Professional demeanor.
